

Revised Instructions for Authors (With effect from January 2011)

AIMS AND SCOPE

This multi-disciplinary Journal aims at promoting all areas of pure and applied ecology (plant, animal, microbial and human ecology) and environmental science (including environmental pollution, conservation, natural resource management, sustainable development, global change, climate change - impacts, mitigation and adaptation, ecological economics, environmental policy and law), particularly in developing countries. The scope of journal is quite broad to cover ecological research from population to landscape level, and both terrestrial and aquatic (freshwater and marine) habitats, and all aspects of environmental management.

The Journal publishes Original Research Papers, Reviews on topics of current interest (usually by invitation), Short Communications, View-points and Commentaries, and Book Reviews. Special issues, based on specific themes, are published at the suggestion of the members of the Editorial Board and conveners of international symposia and conferences. Case studies of environmental problems and their management in different countries or regions, and reports of recent conferences are also published. All contributions submitted to the Journal for publication are peer reviewed for their suitability by at least two researchers in the relevant field before their acceptance.

Authors interested in communicating their research and other contributions for consideration of the editors for publication in the Journal must ensure that the manuscripts are prepared and submitted strictly according to the guidelines described below. Submissions which do not conform to the guidelines will not be processed.

GENERAL INFORMATION

Only original contributions are considered for publication. The authors are required to declare that the manuscript has not been submitted to another journal for consideration at the same time. If the paper is

submitted after it had been returned by another journal, the authors must disclose this fact.

Membership

All authors and coauthors of a paper, who are either Indian nationals (including those working overseas) or have conducted their research in India, must be a Member of the National Institute of Ecology at the time of submission of the manuscripts. Other overseas authors are also encouraged to join the National Institute of Ecology. Details of membership and subscription are available at the society's home page: <http://www.nieindia.org/>

Special Issues

Individuals interested in organizing special issues devoted to a single topic of current interest or based on papers presented at a conference or symposium must submit a proposal with full details and seek prior approval of the Editors for the purpose.

These issues should consist of at least 6 contributions besides an introductory and/or a synthesis article. They may extend to two combined issues (up to 200 printed pages) and rarely to a full volume (up to 400 pages).

The proposers will usually be designated as Guest Editors, and will be responsible for ensuring that all contributions strictly follow the guidelines for the preparation of the manuscripts and other requirements of the journal are adhered to fully. The Guest Editors shall submit all the manuscripts together in the final edited form, together with a list of reviewers who helped them in the process, and their comments on the original submissions.

PREPARATION OF MANUSCRIPTS

The manuscript should be written in English in a clear, direct and active style. Manuscripts should follow a standard page layout: only Letter or A-4 size, 2.5 cm

margin on all the four sides, and 1.5 line spacing. The text should be carefully checked for typographical errors, especially numerals and diacritical marks in words from different languages. British spellings are preferred. However, there should be uniformity throughout the text. All pages must be numbered sequentially to facilitate reviewing and editing of the manuscript. Manuscripts should be word-processed using either Microsoft WORD 2003 or 2007 or Corel WordPerfect 9 or higher version.

Manuscript Length

Research Papers are at least eight journal pages in length (including figures) and a maximum of 20 pages. Short Communications are 4 to 6 pages long. The maximum length for comprehensive Review Papers is forty pages. Mini-Reviews, not less than 10 pages in length, are also considered if they cover an important topic of contemporary interest. Commentaries and Viewpoints are usually restricted to 4-6 pages and Case Studies vary in length up to 20 pages according to the subject. Book Reviews are usually restricted to a single page. Generally, the figures and tables should not exceed approximately one-third of the total length of the paper. Supporting data, where necessary, may be placed in an appendix.

Title Page

The title page should comprise: full title of the paper, initials and surname of author(s), name of the laboratory where the work was carried out, current institutional affiliations with full address and E-mail IDs of all authors and the complete postal address of the corresponding author with whom all correspondence concerning the manuscript should be made. Please add Telephone and Fax numbers as well as E-mail address.

The title should be precise and brief. Abbreviations should not be used. The title must be written in title case (first letter capital except for articles, conjunctions and prepositions).

Abstract

An Abstract should be placed after the title page. Summary is not required at the end of the paper. The Abstract should include sufficient information on the objectives, study area, methods, main results and major conclusions. The Abstract should preferably be arranged

in numbered paragraphs to cover all this information. It should not cite any reference and should be limited to 5% of the text (excluding references).

Authors may add an Abstract in German, French and/or Spanish language as well but should certify that the translation has been verified by an individual well-versed with that language.

Key Words

Six to ten key words should be provided after the Abstract. No key word should be repeated from the title of the paper.

Running Title

Authors should also provide a short 'running title' (not exceeding 40 characters) for use in the header. It should be placed on the abstract page after the Key words.

Organization of the Text

The main text of the paper should start from a new page. It should be reasonably subdivided into sections and subsections. In no case, the text should be organised at more than four levels of subdivision.

Research Papers should be structured into sections as Introduction, Materials and Methods, Results, Discussion and Conclusion. Methods should be described in adequate detail. Field studies should include an adequate account of the study area and the sampling sites in a separate section. For Review Papers, Commentaries and Viewpoints, the text may be subdivided according to the issues to be discussed.

The Review Papers should mention any previous important reviews in the field and contain a comprehensive discussion starting with the general background of the field. It should then go on to discuss the salient features of recent developments. The authors should avoid presenting material which has already been published in a previous review.

References to published literature should be cited in the text by the author's name and year: e.g., Keddy (2010) when forming part of a sentence, or (Keddy 2010) when forming an addition to a sentence. If a paper has three or more authors, then it should be referred to by the surname of the first author and expression et al. (for example, Santaniello et al. 2003). The author's name and year are not separated by a comma. Two or more citations, when placed together within parentheses, should be separated by a comma.

Style, Language and Abbreviations

The manuscript style must be uniform throughout the text. The language should be concise and clear. Authors should check the manuscripts thoroughly for any grammatical and typographic errors. Special attention should be paid to diacritical marks and spellings of words from other languages.

No part of the manuscript should be underlined (or italicized) except for the Latin binomials of organisms (genera and species). Phrases such as *in vitro*, *in vivo*, *per se*, *i.e.*, *e.g.* and *et al.* are also not italicised.

Footnotes should be avoided. When absolutely necessary, these should be numbered consecutively by superscript Arabic numerals and should be placed at the end of the text. They will be inserted on the relevant pages after the text is edited and accepted for printing. Endnotes are not accepted. References should in no case be referred to in the text by numerals.

Abbreviations, except those of standard units of measurement, should be avoided. When necessary, all non-standard abbreviations should be placed in parentheses after the words or phrases when they appear first in the text. However, non-standard abbreviations should not be used unless they appear several times in the text. If there are more than ten abbreviations used in the text, they should also be listed in alphabetical order, along with their expanded form, at the end as an appendix.

Units of Measurement

Only metric units (S.I. Units) should be used. If other units have to be necessarily used, their equivalent values in SI units should be given in parentheses. Abbreviations of units are same for the singular and plural, and are never followed by a period. Most commonly used metric system units, symbols, and their prefixes are listed below. For detailed information on SI Units, authors should consult BIPM (2006).

Quantity	Unit	Symbol
Length	meter	m
Mass	kilogram	kg
Time	second	s
Electric current	ampere	A
Thermodynamic temperature	kelvin	K
Amount of substance	mole	mol
Luminous intensity	candela	cd

Prefix	Symbol	Multiplication factor
peta	P	10^{15}
tera	T	10^{12}
giga	G	1 000 000 000
mega	M	1 000 000
kilo	k	1000
hecto	h	100
deka	da	10
deci	d	0.1
centi	c	0.01
milli	m	0.001
micro	μ	0.000 001
nano	n	0.000 000 001
pico	p	10^{-12}
femto	f	10^{-15}

SI derived units with special names and symbols:

Quantity	Name	Symbol	Relation to other SI units
Celsius temperature	degree Celsius	$^{\circ}\text{C}$	K
electric conductance	siemens	S	A/V
electric potential difference	volt	V	W/A
electric resistance	ohm	Ω	V/A
energy, quantity of heat	joule	J	N·m
force	newton	N	$\text{kg}\cdot\text{m}/\text{s}^2$
illuminance	lux	lx	lm/m^2
luminous flux	lumen	lm	cd·sr
power, radiant flux	watt	W	J/s
pressure, stress	pascal	Pa	N/m^2
activity (of a radionuclide)	becquerel	Bq	1/s

Non-SI units in use

Quantity	Unit	Symbol	Value in SI units
Time	minute	min	1 min = 60 s
	hour	h	1 h = 60 min = 3600 s
	day*	d	1 d = 24 h = 86 400 s
Plane angle	degree	$^{\circ}$	$1^{\circ} = (\pi/180)$ rad
	minute	'	$1' = (\pi/10800)$ rad
	second	"	$1'' = (\pi/648 000)$ rad
Area	hectare	ha	1 ha = 10^4 m ²
Volume	liter	L	1 L = 1 dm ³ = 10^{-3} cm ³
Mass	metric ton	t	1 t = 10^3 kg = 1 Mg
Energy	calorie	cal	1 cal = 4.18 J
Pressure	bar	bar	1 bar = 10^5 Pa
Length	micron	μ	$1 \mu = 10^{-6}$ m
	Angstrom	\AA	$1 \text{\AA} = 10^{-10}$ m
Radioactivity	Curie	Ci	1 Ci = $3.7 \cdot 10^{10}$ Bq

* also: week (wk); month (mo) and year (y)*

Mathematical and Greek Symbols

Mathematical symbols, Greek letters and unusual symbols should be identified separately in the margin. Greek symbols and special characters often undergo formatting changes and get corrupted or lost during preparation of manuscript for publication. To ensure that all special characters used are embedded in the text, these special characters should be inserted as a symbol but should not be a result of any format styling (*Symbol* font face) otherwise they will be lost during conversion to PDF.

Distinction should be made between confusing letters like letter O, zero (0) and degree sign ($^{\circ}$); between the letter l, the number one, exclamation (!), and prime ('); between K and kappa (κ), r and gamma (γ), p and rho (ρ) and X and chi (χ). These characters must be named in the margin.

Equations

Small mathematical expressions (equations), which are set within a line, should avoid large symbols and complex exponents. Larger equations should be set in separate lines and when several equations are presented, these should be sequentially numbered with Arabic numerals flushed to the right margin.

Nomenclature

Latin binomial names of all organisms should be given in full, together with their respective taxonomic authority, the first time they appear in the text. The genera can be abbreviated to a single letter (followed by a period) only in case the initials of two genera are not the same and do not cause confusion. The Latin name and taxonomic authority should be given for all experimental species also. The basis for the nomenclature of taxa should be indicated in the Methods section. Authors should ensure that all nomenclature is current and conforms to accepted standards and international codes, including those for the micro-organisms and cultivated plants.

Chemical nomenclature must conform to the Subject Index of Chemical Abstracts. Chemical formulae (for example, CO_2 , CH_4 , H_2O) should preferably be avoided as abbreviations in the text.

Tables

Each table should be placed on a separate page and all

numbered consecutively with Arabic numerals in the order they are referred to in the text first. Each table should be provided a short title. Data that can be readily presented in the text should not be tabulated. Large tables with too many columns should be avoided. Where necessary, the data should be arranged into two or more tables. Sometimes, the columns and rows can be transposed for better formatting. Column headings should be kept as brief as possible. Some information (such as units) can often be transferred to the caption. Footnotes should be kept to the minimum necessary. Lengthy tables of data or essential methodological details may preferably be placed as an appendix to the paper.

Figures/Illustrations

All diagrams, graphs and photographs should be referred to in the text as figure, and numbered consecutively with Arabic numerals in the order of their citation in the text. Terms such as plate, chart and graph should not be used. All the figures should be provided a detailed caption and all captions should be typed together on a separate page. Figure number and caption should not be inserted in the figure.

Line drawings, bar charts and other figures containing text must be checked carefully for the line thickness and font size. The figures should generally be able to withstand reduction to a single column width of 8.5 cm without loss of legibility and distinction between line and fill styles. The titles of X and Y axes must be concise and must include the units.

Each figure should include a single illustration. Each figure should be closely cropped to minimize the amount of white space surrounding the illustration. Figures consisting of two or more separate parts, should be submitted as a single composite illustration file and each part should be identified by an alphabet (A, B, C etc.). Photographs should be submitted as high-resolution graphic files, and should include a bar of scale, where necessary.

For figures which include an image based on lines and text and do not contain tonal or shaded areas, the preferred file format is TIFF or EPS. If colour is necessary, the figures should be in RGB mode with 900-1200 dpi resolution.

For halftone images, which have a continuous tone photograph and contains no text, the preferred file format is TIFF. These should be in RGB colour mode or grayscale, with a minimum resolution of 300 dpi.

Figures which combine both halftone and text or

line art elements, the preferred file format is TIFF, RGB colour mode or Grayscale and 500-900 dpi resolution.

Following file formats are preferably acceptable: EPS (for diagrams); PNG (for photos); PowerPoint version 2003/2007 (each page with a single figure); TIFF; BMP and JPEG (high resolution; >300 dpi).

Please do not embed graphics in your word processor, spreadsheet or presentation. Low resolution GIF files are not accepted. EPS should only be used for images produced by applications such as CorelDraw. Figures prepared in an Office application, such as Word or PowerPoint, should not be converted to JPEG or another format.

If the figures are prepared by hand and scanned or taken from some publication, they should be carefully checked for clarity, legibility and high resolution.

ACKNOWLEDGEMENTS

Please acknowledge every individual, institution or organisation who has contributed to the study by making substantial contributions to conception, design, collection of data (sampling and analysis), or analysis and interpretation of data, or who was involved in drafting the manuscript or revising it critically for important intellectual content. Please list the source(s) of funding for the study (with appropriate grant number), for each author, and for the manuscript preparation.

Conflict of Interest

Any actual or potential conflict of interest including any financial, personal or other relationships with other people or organizations within the period of study of the submitted work that could inappropriately influence, or be perceived to influence, their work, should be reported.

REFERENCES:

All references cited in the text (including those in the Tables and Figures) should be listed in alphabetical order of the first author's surname in the reference section. Several references by the same first author should be arranged in the order of the surnames of the second author, then third author and so on. Two or more references by the same author(s) in the same year should be identified by adding the letter a, b, c, etc after the year.

The reference must be fully formatted before submission. All references must be complete, accurate, and without any abbreviation. Irrespective of the number of authors and/or editors, all names must be included. et al. should not be used. Journal titles should not be abbreviated. Books, Collective works, Project Reports and Government Reports should include the name and place of the publisher, and the total number of pages. Conference Proceedings should include also the information on the organisers, place and date of the Conference. Theses and Dissertations must include the degree awarded, name and place of the University, and the total number of pages.

Reports and other publications for which the authorship is not clearly stated, may be referred to Anonymous. However, in most cases, these can be credited to some individuals or organisations or institutions. Where such publications are cited by the acronym of an institution or organisation, its full name should be listed in parentheses after the acronym.

Unpublished papers and personal communications should not be included in the reference section but they may be mentioned in the text and identified as such in parentheses. Papers accepted for publication should include (in press) in parentheses in place of volume number and pages.

Citations for articles/material published exclusively online or in open access journals must contain the exact Web addresses (URLs) at the end of the reference(s). Online citations should also include the date of access.

A few examples of references are given below.

BOOK REVIEWS

Book reviews are published only if the publishers submit a copy of their recently published books (both print and electronic) relevant to the journal. Unsolicited reviews of books by individuals are not accepted. All submitted books are reviewed by an independent expert on the subject matter of the book.

SUBMISSION OF MANUSCRIPTS

The Journal is planning to switch to totally on-line submission, review and editing process. In the meantime, the Journal will handle the manuscripts only electronically by e-mail. Henceforth, hard copies (printed on paper) should not be posted.

Manuscripts should be submitted by one of the authors of the and should not be submitted by anyone on their behalf. It is mandatory that the corresponding author submits a signed Covering Letter and the Check Sheet along with the manuscript, on behalf of all the co-authors (if any). Before submission, the author(s) must ensure that the manuscript has been prepared according to the guidelines described above.

Covering Letter

The Covering Letter should state very briefly the scope of the article, its relevance to the Journal, and the major contribution to the knowledge in the field.

The corresponding author must declare that all co-authors (if any) have actually read the manuscript and approved the order of their names, and the contents.

The cover letter should also indicate the nature and extent of the contribution of each of the coauthors.

The author(s) should confirm that the manuscript (or any part of it) has not been published previously or is not under consideration for publication elsewhere.

Furthermore, if any illustration or table that has been published elsewhere is reproduced, the authors should confirm that the copyright permission for reproduction has been obtained.

It should be further declared that the article contains no unlawful, defamatory, fabricated, plagiarized, or otherwise unethical information or material.

Check Sheet

Further information on the compliance of the Journal's requirements is required in a check sheet. The corresponding author should download from the journal's website (www.nieindia.org/ijees/) a copy of the check sheet, fill it and sign. The signed check sheet must be submitted, as a Word or PDF file, with the manuscript.

Naming of Files

The word-processed text files (including tables), the graphic files of the figures, the covering letter and the Check Sheet should be named in a manner that these can be readily identified with the author(s) and title of the paper (for example, author_title_text.doc). File names such as text.doc, paper.doc, sengupta.doc or figure1.jpg are NOT acceptable.

The files should not be converted to PDF.

E-mail Submission

All files of the manuscript must be submitted by e-mail only to the editor at ijees1@gmail.com. The files may be compressed into a zip file only if there are too many figures. The subject line in the e-mail should clearly indicate that a new manuscript is being submitted. The text message should invariably provide the full address and contact details of the sender. The corresponding author must ensure that the files are free from any virus. Anonymous mails may be deleted without checking the attachments.

The corresponding author may also copy the e-mail with all attachments to only one of the Editors.

PROCESSING OF THE MANUSCRIPTS

The manuscripts submitted in the manner stated above will be acknowledged within a week after verifying that they follow the instructions and meet other requirements fully. The corresponding author will be advised about the shortcomings, if any.

Manuscripts, which meet all requirements of the guidelines, will be sent to at least two experts for review, after obtaining their consent. A decision on the acceptability of the manuscript for publication will be taken after considering the comments of the reviewers. The authors may be asked to revise their manuscripts and respond to the reviewers' comments. Manuscripts which require a major revision, may be subjected to another round of peer review.

After the manuscript is accepted for publication, an e-mail communication to that effect will be sent to the corresponding author.

Page Charges

The journal does not levy page charges for manuscripts submitted by the Members of the National Institute of Ecology. Authors are, however, required to pay about 50% of the cost of reproduction of colour plates.

Overseas authors, who are not a Member of the NIE, may be asked to pay page charges. Such papers will have open access on the journal's web site.

Copyright

The copyright in published papers is vested with the publisher, the National Institute of Ecology. The authors of accepted contributions will be asked to formally sign an agreement to transfer the copyright to the publisher. The authors retain certain rights over their work for non-commercial use after acknowledging the source.

Changes to Authorship

Before the manuscript is accepted, the corresponding author may request for adding or removing an author, or to rearrange the author names, by explaining the reasons for such changes and a written and signed confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. This includes confirmation from the author(s) being added or removed. Retirement or illness or death of an individual cannot be the reason for such a change.

After the manuscript has been accepted for publication, requests to add, delete, or rearrange author names in the article will not be entertained for any reason.

Proofs

Page proofs are sent to the corresponding author only as a PDF file by e-mail, along with instructions for corrections. The authors should print the file and mark on it the corrections. Copy editor's queries are embedded in the file and are highlighted. The corrections required and the responses to the queries should be listed in a Word file by referring to the page/column/para/line and communicated by e-mail to the Editor without delay but within not more than 5 working days. Alterations in the proofs, other than those necessitated by the printer's errors, should be kept to the minimum.

Reprints

The Journal does not provide gratis reprints. The corresponding author of a paper will receive a PDF file of the published paper for sharing it with the coauthors. Authors can distribute it freely by e-mail or make hard copies for private circulation only. The PDF files are secured against any kind of alteration and/or extraction of the contents.

If required, printed paper copies of reprints can be ordered, in multiples of 50, on payment at the time of correcting proofs. An order form and the price estimate will be sent upon request only.

ADDITIONAL GUIDANCE

Many excellent books are available on the subject of writing scientific and technical articles in all disciplines. These books provide detailed guidance also on the style, language and grammar. Several publications are devoted specifically to the analysis and presentation of data in graphic form. Younger authors in particular are advised to consult these publications.

The National Institute of Ecology is willing to offer short-term training in scientific and technical writing to younger researchers anywhere in India. Those interested in such training may contact the NIE at: secretary@nieindia.org

INTERNATIONAL JOURNAL OF ECOLOGY AND ENVIRONMENTAL SCIENCES

Check Sheet for Submission of Manuscripts

[This sheet must be filled in, signed and submitted together with the manuscript. Incorrect statements or suppression of facts will result in the rejection of the manuscript without review.]

1. Title of the Paper:

2. Corresponding author (Name and E-mail ID):

3. Categorisation of the Contribution:

Research Paper Review/Mini-Review Short Communication Commentary/Opinion Case Study

4. Number of Text Pages (including Title page) Number Tables Number Figures

5. Has the paper been prepared according to the guidelines of the journal? Yes/No

6. Has the text been prepared in MS-WORD 2003/2007 *or* WORD PERFECT 9 or above format? Yes/No
(*Note: files from MS-VISTA are not accepted.*)

7. Have only SI units been used? Yes/No

8. Have the tables been set and saved on separate pages? Yes/No

9. Have the figures been prepared as separate graphic files? Yes/No

10. Have all references cited in the text been listed correctly at the end? Yes/No

11. Have the references been checked for their completeness and conformity with the Journal's style? Yes/No

12. Have any colour figures or photographs been included? Yes/No
(*Note: If yes, you agree to pay part of the production costs, in case the manuscript is accepted for publication.*)

13. Has any figure or table been reproduced from previously published material? Yes/No

13a. If yes, has permission from the copyright owner been secured? Yes/No

14. Have the Latin binomials of organisms been checked and their authorities included at the first instance? Yes/No

15. Are you and/or your coauthors an Indian National? If not, have you conducted the study in India? Yes/No

15a. If yes, are you and your co-authors members of the National Institute of Ecology? Yes/No

16. Have all authors checked the text and agreed to the sequence of authors? Yes/No

17. Have the text, tables and graphic files been named appropriately to indicate author and title? Yes/No

Ecology: Into the next 100 years

London, United Kingdom; 18 - 23 August 2013

'**Ecology: Into the next 100 years**' is a major international ecological congress which combines the 11th INTECOL Congress with the Annual Meeting of the British Ecological Society (BES) to celebrate the latter's centenary in 2013.

The theme of the congress is '**advancing ecology and making it count**'. This reflects the ambition of the BES to present world class ecology at a meeting that truly moves the science forward. The congress is the centre piece of the Society's Festival of Ecology centenary celebrations.

The congress programme will include world class plenary speakers, symposia featuring major keynote lectures, submitted abstract sessions and extended poster slots. Other major features will be innovative ways for presenting and communicating science, and a programme structured to provide many opportunities to meet people. This congress will give delegates a new perspective on a wide range of ecological topics and help establish new collaborative partnerships.

The INTECOL 2013 Congress promises to be truly global as the ecological societies from all continents are sponsoring the event. The National Institute of Ecology is proud to join the event as an academic sponsor - so far the only one from South and Southeast Asia.

The NIE proposes to showcase Indian contributions to ecology at the 2013 Congress and bring out several publications. Suggestions are invited from all ecologists from India as well as the South Asian countries. Please e-mail your suggestions to secretary@nieindia.org or nieindia@gmail.com
